comidor
Digital Transformation and Automation Platform

App Builder - Limited By Your Imagination

Fields and Forms
Create the fields and forms required. Drag the fields into your forms to collect data in the App.

Reporting
Build reports and dashboards in minutes. Get real time information in table or graph format.

Publish
Assign users and then publish your App. Apps can be built in hours and they are ready to use!

Step by Step Guide
Comidor guides you through each step and enables process automation with rapid development and deployment. No coding skills required!

Summary Table
Design your summary table with the fields and format required and provide a searchable table for users.

Workflow
Use Comidor's workflow capability to automate end to end processes and tasks. Rich functionality enables notifications, SLA's, Doc Creators, RPA etc.

Unique Features, Unrivalled Performance
